Profile

I have three applications in daily use at the company where I work. I'm driven by problems I don't yet know how to solve: I learn what's needed, apply it and keep it running in production, with persistence and patience when the problem is hard. Ten years of customer-facing work taught me to listen, stay calm and explain technical things clearly.

Experience

Software Developer (self-employed)
For Delmar Calefacción S.A.S. · Dec 2025 – present

- **Warma:** digitized the heating load calculation the company had done on paper for over 40 years. Designing an installation went from 3–4 hours to 1 hour, across 50+ projects so far.
- **Nexo Delmar:** brought stock, prices and sales from MercadoLibre and Tienda Nube (~300 products) into one place, replacing manual inventory counts.
- **Caldera Care:** operations management for the technical service team, which handles 10 to 15 customers a day. For the first time, the company can measure each technician's work.
- Also migrated a legacy Clipper/FoxPro system and corrected the VAT status of ~1,800 customers through the Argentine tax authority (AFIP) web service.
- I build with Claude Code: I plan, scope the agent's tasks, review every change, and verify it with tests and in the running app.

Technical Sales and Service
Delmar Calefacción S.A.S. · Villa María · Jun 2025 – present

- Design and sale of central heating systems, from installation sizing to the final quote.
- Technical advice to customers and installers.
- Service and repair of heating equipment and installations.

Service Station Attendant
Shell service station · 2015 – 2025

- Ten years of customer service and cash handling, solving problems on the spot and often under pressure.
- IT support for the point of sale.

Academic project

Monix: web and Android home banking app
Professional Practice I · team project · monix-homebanking.vercel.app
Team-built home banking app connected to a simulated Central Bank: peso and dollar accounts, transfers (including over Bluetooth), loans, and QR and NFC payments.

Technical skills

Languages: TypeScript, JavaScript, Python, SQL · **Frontend:** React, Vite, Tailwind CSS
Backend: FastAPI, SQLAlchemy, REST APIs · **Databases:** PostgreSQL, Supabase, PL/pgSQL
Integrations: OAuth 2.0, webhooks, MercadoLibre, Tienda Nube, AFIP · **Tools:** Git, GitHub, Vercel, Render, Linux
AI-assisted development: Claude Code, AI agents, Lovable · **Quality:** automated testing (Vitest, pytest), code review
Academic use: Node.js, Express, Docker

Education

Computer Systems Analyst | Instituto Leibnitz | 2025 – 2027 (expected)
High school diploma, Computer Science track | Instituto La Santísima Trinidad | 2010 – 2016

Certifications

Linux, beginner level | Instituto Leibnitz · 2026
EF SET English Certificate (C2) | EF · 2021 · efset.org/cert/JsXiSg

Languages

Spanish: native. English: C2 (EF SET 77/100).
